EDITORIAL

Anais Brasileiros de Dermatologia. Beginning a new five-year term, 2026-2030

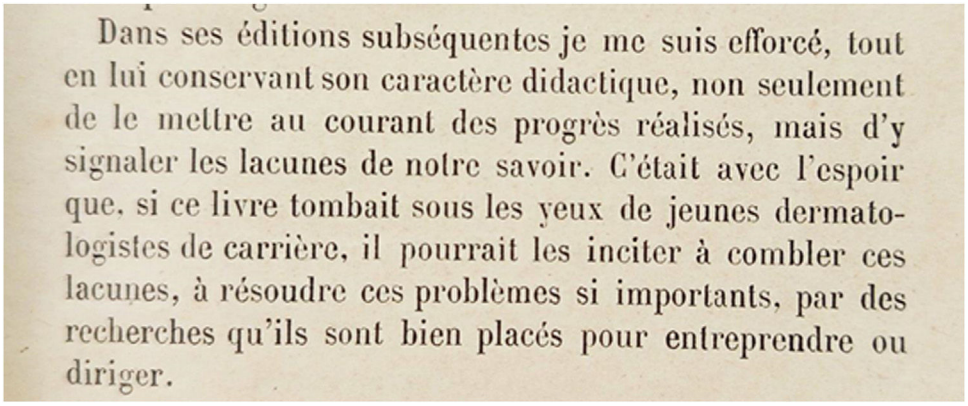
In 2026, a new five-year editorial period begins in the *Anais Brasileiros de Dermatologia*.

The group that starts now consists of myself as Scientific Editor with three Associate Editors: Jane Tomimori from Universidade Federal de São Paulo, Neusa Yuriko Sakai Valente from Universidade de São Paulo, and Renata Ferreira Magalhães from Universidade Estadual de Campinas.

Our mission will be to continue the work of the previous group,[1,2] valuing the quality of the selected articles, contributing solidly to the dissemination of scientific progress.

In the text excerpt depicted below (Fig. 1), ffrom the preface of the fourth edition of the *Précis de Dermatologie* of 1928, Darier expresses his concern, almost a century ago, to fill the knowledge gaps,[3] which we do to this day, in every research and in every publication.

Each piece of information that we make available to the global dermatological community helps to fill gaps and complete the complex understanding of skin diseases, which is experiencing so many diagnostic and therapeutic advances.



Dans ses éditions subséquentes je me suis efforcé, tout en lui conservant son caractère didactique, non seulement de le mettre au courant des progrès réalisés, mais d'y signaler les lacunes de notre savoir. C'était avec l'espoir que, si ce livre tombait sous les yeux de jeunes dermatologistes de carrière, il pourrait les inciter à combler ces lacunes, à résoudre ces problèmes si importants, par des recherches qu'ils sont bien placés pour entreprendre ou diriger.

Figure 1 Excerpt from the preface to the fourth edition of *Précis de Dermatologie of 1928*.
In subsequent editions, while maintaining its didactic characteristics, I have strived not only to make known the progress made, but also to point out the gaps in our knowledge. This is done in the hope that if this book falls before the eyes of young dermatologists, it may encourage them to fill these gaps, to solve these truly important problems, through research that they undertake.
